

## Supported electronic devices for distance, horizontal and vertical angles measurement

For measurement angles and distances Field-Map can connect different electronic devices.

### Note:

When working with TruPulse, Field-Map Data Collector supports duplex communication which allows to automatically set the device to the correct measurement mode according to type of measurement currently performed.

### Distance and vertical angle measurement devices

*Impulse/  
Forest PRO (LTI)*

*Vertex IV  
(Haglof)*

*Disto 8  
(Leica)*

*Angle Encoder, TruAngle  
(LTI)*

*MapStar  
(LTI)*

*Mechanical compass*

### Distance and horizontal, vertical angle measurement devices and total stations

*TruPulse (LTI)*

*Laser station  
(Leica)*

*SET 50RX  
(Sokkia)*

### Remote diameter measurement devices

*LTI Impulse/  
Forest PRO (LTI)*

*Criterion RD 1000  
(LTI)*

*TruPulse (LTI)*
